Benefits

Environmental benefits : Lowering environmental impact - Vernacare's single use system uses less energy and water than re-usable systems to dispose of biodegradable medical pulp products, using the market-leading Vortex pulp disposal unit.

Nurse Time Benefits : Increasing productivity and convenience – Vernacare's single use system helps to improve working conditions, increase patient dignity and save nurse time, releasing more time to care for patients

Financial Benefits : Reduced running costs –Vernacare's single use system can cost significantly less to purchase, operate and maintain than alternative re-usable systems. Further financial benefits are provided through the savings in nursing time and reduction of costly HCAs.

Infection Prevention Benefits : Raising infection control standards – Vernacare's single use system removes concerns over the effectiveness of thermal washer disinfectors and helps to break the chain of infection

Additional Information

Vernacare is a leading infection control organisation, whose innovative single-use system and award winning products have made us global leaders in human waste management across the healthcare sector.

Vernacare pioneered the single-system more than 50 years ago, to help reduce the risk of cross-infection and save nursing time, whilst minimising the environmental and cost impact of alternative re-usable systems. We are also the only company to manufacture the complete human waste disposal system, including pulp disposal unit and a full range of medical pulp products.

Vernacare pulp products carry the BSI Kitemark and are manufactured in line with BS EN ISO 9001:2008 and PAS29:1999, using 100% over-issued clean newspaper. As the biggest medical pulp moulder in the world, producing around 150 million units per year, we have invested heavily in automation and quality control measures to ensure that the product quality is of a consistently high standard. We employ over 200 people worldwide and work with global network international partners to deliver the Vernacare system to over 50 countries.
